

Implement a program on Multithreading

```
class Multi2 implements Runnable{
    public void run()
    {
        int a=5;
        int b=7;
        int c=a+b;
        System.out.println("Addition :"+c);
    }

    public static void main(String args[]){
        Multi2 m1=new Multi2();
        Thread t1=new Thread(m1);
        t1.start();
    }
}
```

Output:

Addition :12
